

ENGINE ITEM LIST

Engine control cable brackets (all)

Extra rod ends for the engine controls

Fuel pump cooling shroud and stud

Fuel pump fitting adapter to match the fuel line fitting

Hobbs meter pressure switch

Extra adel clamps for numerous engine line securing

Safety wire hardware that fit under the engine mount bolts (4)

90 feet of thermal wire for engine sensors

Two five-amp breakers for the electronic ignition

Thirty feet of RJ400 cable, connectors and nipple boots for the electronic ignition

Verify all the parts are with your RAM air. *(Mine weren't).*

One case of mineral oil for engine break-in

If getting and IO-550G built by Performance Engines be sure to ask for the baffling kit to fit the "G" model. The engine fast build can be done at Lancair along with the wiring now. It's worth the extra money in the long run. Trust me.
